

A photograph taken from the driver's perspective inside a rally car. The car is on a dirt road, and another rally car is visible in the distance. The interior features a steering wheel, dashboard with gauges, and a central console. A large red fire extinguisher is mounted on the right side of the car, and a first aid kit is visible in the foreground. The text "What would your next call be?" is overlaid in white at the top left. The text "RALLY SOS" is overlaid in large red and black letters at the bottom right.

What would your next call be?

RALLY
SOS

In the sport of Rally it is competitors that play the vital role as first on scene and first intervention at the scene of a rally motor vehicle accident. Our aim as a small independent team of competitors and professionals in Fire Safety and Medicine is to educate, empower and better prepare our fellow competitors to respond safely, communicate wisely and provide appropriate first aid care at an accident scene. In light of recent tragedies in the rally community and for the love of rally we must look out for each other with a proactive safety first approach. The better prepared the easier the journey if the unforeseen occurs on a rally stage. All are welcome, so please join us for a Rally SOS information night.

The Rally SOS team:

Kate Lehmann (Co-Driver, Synergy Rallysport), Josh Doyle (Driver, Synergy Rallysport), Naomi Tillett (Co-Driver, International Tarmac Rally Champion), Declan Dwyer (Driver, 2012 South Australian Rally Champion), Bruce Paix (Driver, Rally Ace and Rally Chief Medical Officer), Thien LeCong (Rally Chief Medical Officer Rally).
